

Relevant Data – Weekly report graphs below

This data comes from the Centers for Medicare and Medicaid Services, an agency of the U.S. Department of Health and Human Services. It is the result of weekly reports submitted directly from every U.S. nursing facility that receives funding from Medicaid.

This data is available to the public online at: <https://data.cms.gov/stories/s/COVID-19-Nursing-Home-Data/bkwz-xpvg/>

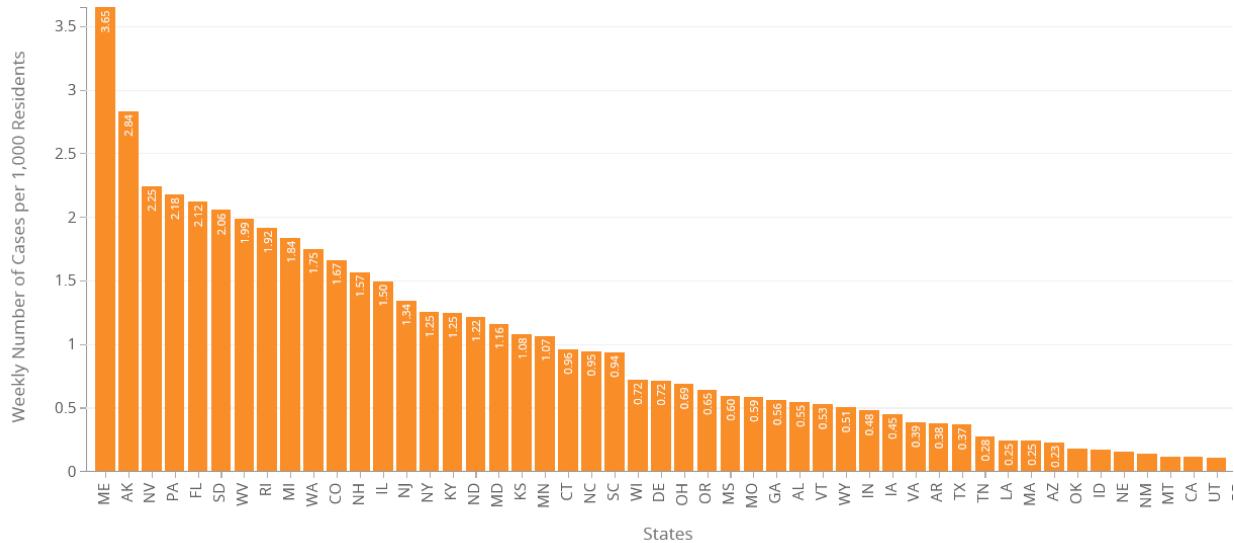

On March 25, Director Shah told viewers of that day's press briefing that Maine had gone more than 30 days without a COVID-related death among nursing home residents. CMS data shows Maine had six deaths during the period he described. He made that statement in the middle of a week in which Maine led the nation in nursing home infections. In reality, CMS data shows that Maine's infection rate was more than double that of the next highest state.
